

Know Your Enemy

Words by James Kennedy 2011

Big banks, big business
Big government we charge you as guilty
Of treason & perjury
War crimes & daylight robbery

'Cos they're all criminals now
They're all criminals now
Left or right, black or white
Same agenda, different lie

We are many & they are few
And we are their biggest fear
We don't need to know the answers
Just know your enemy

So the middle & the working classes must stress & toil
To pay the bailouts, ever higher taxes & wars for power & oil
While they loot this planet by force, lies & fear
When are we gonna see the systems rigged & our votes
Will never ever, never ever change it

'Cos they're all criminals now
They're all criminals now
They're all criminals
Don't be a sucker to their political charade

I know my enemy
And our war is always with me
